President’s Goals
2012-13
Linda L. Lacy

1. Complete objectives focused on the improvement of Teaching Practices, Academic Infrastructure, Instructional Programs, Support Services, Resource Management, Campus Leadership, and Student Engagement in order to ensure improvement in student success.

2. Provide a comprehensive and transparent budget plan to the Board and college community. The budget plan will outline strategies to deal with the mid-year budget reductions if the educational tax measure does not pass in November 2012. This budget plan will also include items that will require negotiations with unions.

3. Maintain communication and working relationships with college constituent groups.

4. Design and improve a staff development plan that meets the needs of and strengthens the institution.

5. Pending available resources, initiate an Early College pilot program with the focus on science, technology, engineering and mathematics.

6. Complete the annual strategic planning process and seek approval from college constituent groups.
   a. Ensure that the Board is appropriately involved in the process (Board Self-Evaluation Item 2.4)
   b. Inform the college and the Board of the completion status of planning objectives.

7. Monitor the progress, provide support to the Accreditation Steering Committee, and regularly provide the Board with progress reports to promote a successful 2014 Accreditation site visit.

8. Expand the open source textbook program, continue to implement the technology plan, and improve the distance education program.

9. Facilitate activities that provide an opportunity for the Board to address areas of improvement identified by the 2012 Board Self-Evaluation.
