An Interactive Workshop for Parents

Mathematics with Confidence & Success?

YES!

Thursday, April 23, 7pm

$5/person - Advance reservations requested.

This session will empower parents to see themselves as capable mathematicians and problem solvers able to inspire and enhance their children’s learning experiences. Through a hands-on, problem-solving approach, it will focus on strategies and tasks that help students truly understand and make sense of mathematics. Parents will develop a conceptual understanding of core mathematical ideas through their application in everyday contexts. Participants will leave with a better understanding of mathematics and a set of problem solving strategies that will provide them with the tools necessary to help their children develop confidence and success in their math classes for years to come.

Erich Zeller, Facilitator

Mr. Zeller is an Elementary Mathematics Instructional Specialist for the Los Angeles Unified School District and a mathematics consultant for Marilyn Burns Educational Associates, a national consulting firm working with school districts across the U.S. to improve Mathematics education for students in grades K-8. Over the past 15 years, he has worked as a classroom teacher, a mentor teacher, and a university instructor for Math and Science curriculum and methods courses. As a board member with the Los Angeles Teachers of Mathematics Association, Mr. Zeller has been a leader in local, state, and national efforts to improve math education for all students.
