How about some “one-on-one” training using current computer technology to complete your homework assignments?

1. Create a “Learning Profile” to identify your learning style.
2. Learn the basics of Microsoft Word.
3. Use K 3000 to scan your textbook and have the computer (or MP3 player) read it to you.
4. Use software to help organize your thoughts.
5. Use “Captains Log” to strengthen your memory.
6. Increase the size of the print on the screen with Zoomtext.

These are just a few of the programs that will help you to be a more successful student!
